

Pulloon Technology Announces Launch of New ATMs to U.S. Market

DALLAS, TX — Pulloon USA and Pulloon Technology today officially announced the expansion of automated teller machine (ATM) sales to the U.S. market. Pulloon is a global manufacturer of ATMs and is best known in the United States for their reliable, high quality dispensers. The company has plans to expand quickly in the U.S., launching with the introduction of two of its most attractive, durable and compact machines designed for high volume locations, through their U.S.-based company [Pulloon USA](#).

“Pulloon built its reputation around designing quality hardware,” said Manny Lopez, president of Pulloon USA ATMs. “As an ATM operator myself, I know how reliability can affect your bottom line. Pulloon produces machines that are going to be workhorses but have the design and features that are attractive to consumers, retailers and financial institution partners. Pulloon ATMs offer all of that – with the added bonus of affordability.”

Pulloon USA has introduced two machines to kick off their U.S. launch – the Sirius I and Sirius II – and is offering a [free trial](#) for either machine to resellers and distributors.

The Sirius I model is the smallest ATM in its class measuring just 1’2” x 1’10” and is perfect for tight spaces that need a lot of cash. It comes standard with an eight inch screen, a touch screen option, a UL291 business hour safe, an e-lock, and is ADA, EMV and PCI compliant. The Sirius 1 comes standard with a 1,000 note removable cassette and can hold up to 8,000 notes.

The Sirius II model boasts high level functionality, including an option for a barcode reader and a 15” high resolution screen with a touch screen option. Available with up to four 2,000 note removable cassettes for maximum volume with either shutter spray and presenter spray options, it also comes standard with a UL291 business hour safe, an e-lock, and is ADA, EMV and PCI compliant.
